\$129,550

Designed by Experience. Built to Go Farther.

We started Geotrek in a Boulder garage with one goal: to build the best value-for-money camper van on the market. No dealer markups. No flashy gimmicks. Just quality systems, solid craftsmanship, and real-world usability.

Now, 300 vans later, we've learned what matters — and what doesn't. Customers kept coming back for the same upgrades: better power, better climate control, smarter storage, and cleaner design. So we built Flatiron around those insights.

This is the van you'd end up with after a year of tweaking — right from day one. It's road-tested, four-season capable, and built to go farther without costing more than it should.

We built Flatiron for the people who take travel seriously, and don't want to waste time chasing upgrades.

We hope it takes you somewhere incredible.

- *Mark & Grant*

Co-Founders, Geotrek Vans

GEOTREK

Built for Real Life on the Road.

Live in it or weekend in it

Flatiron gives you the flexibility to do both. It seats and sleeps up to four, with a convertible bed and lounge system that's easy to use and designed for movement, meals, work, and sleep — not just one.

Power that holds up

Flatiron includes a 10kWh EcoFlow lithium battery system, 400W of roof-mounted solar, alternator charging, and shore power input. You can stay off-grid as long as you want — and track it all from your phone.

Ready for any season

With a built-in diesel heater, Nomadic X2 air conditioning, thermal insulation, and MaxxAir roof fans, you're covered for temperature swings. Hot, cold, humid, dry — Flatiron's systems are already in place.

Cook, clean, and store

A full kitchenette includes a 16" x 14" deep sink, induction cooktop, and efficient Dometic fridge/freezer. You'll also get soft-close drawers, bamboo countertops, and smart storage to keep things organized.

Real plumbing, real pressure

No makeshift showers here. Flatiron comes standard with a 24-gallon fresh tank, 22-gallon grey water tank, pressurized water system, and electric water heater — with an outdoor hot water shower included.

No dealer markup

We sell direct to give you better value — and better materials. No upsells. No cheap shortcuts. Just premium components at a price that makes sense.

What Makes Flatiron Different.

Flatiron isn't just better equipped — it's better thought out. Every inch, system, and decision is built around function and flexibility.

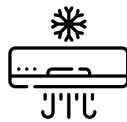

144 AWD SPRINTER CHASSIS

Take on rough roads, mountain passes, or winter conditions — no problem.

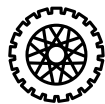

10KWH LITHIUM POWER SYSTEM

Run your lights, fridge, fans, and outlets for days without needing to recharge.

BUILT-IN AIR CONDITIONING

No add-ons, no loud units — cool, quiet A/C that's road-tested and efficient.

OFF-ROAD WHEELS

Upgraded BFG KO3s let you take the road less paved, comfortably.

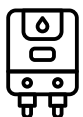

ROOF RAILS

Pack gear up top and keep your interior open and organized.

ESPAR DIESEL HEATER

Proven in cold climates, low power draw, ultra-reliable.

ELECTRIC WATER HEATER

Hot showers and warm wash-ups — no propane, no fuss.

Frequently Asked Questions: Flatiron 2025

Q. Is this van really ready to go? Or will I need to upgrade things later?

A. Flatiron was built to be ready on Day One. You won't need to add power, heating, water systems, or storage — it's already there. Everything's tested and dialed in before delivery.

Q. How long can I stay off-grid in Flatiron?

A. That depends on your usage, but the 10kWh lithium system, 400W of solar, and alternator charging mean most people can stay off-grid for 3–7 days without needing shore power. It's built for remote travel, not just campgrounds.

Q. Can I add more upgrades later?

A. Yes — Flatiron is designed with future upgrades in mind. You can easily add a second battery, Starlink, or even additional cabinetry or seating depending on your needs.

Q. Can I sleep more than two people?

A. Yes. The layout seats and sleeps up to 4 with the optional bench-bed setup. It's flexible enough for couples, small families, or solo travelers who want space.

Q. Is there a bathroom?

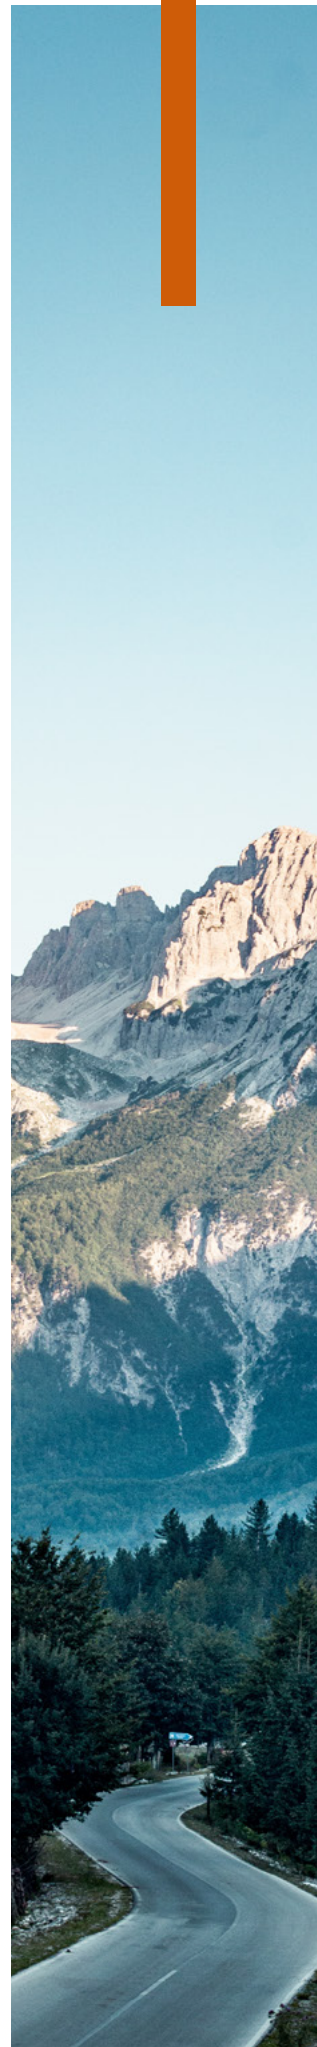

A. Flatiron doesn't have a built-in toilet or shower stall. Instead, it includes an outdoor hot shower system and space for a portable toilet. Most of our customers prefer the added storage and flexible use of space — but we're happy to recommend solutions if needed. includes A/C, larger battery capacity, upgraded tires, a full hot water system, and more built-in comforts. Bear Peak keeps it lean and simple, with a lower starting price.

Q. What kind of warranty do I get?

A. Flatiron comes with a 3-year / 36,000-mile Geotrek build warranty. You also get the full Mercedes-Benz Sprinter chassis warranty (5-year / 100,000-mile powertrain).

Q. How do I buy or reserve one?

A. You can reserve a Flatiron with a \$1000 refundable deposit. We'll walk you through the specs, timeline, and options before you commit.

Your Road, Your Rules.

Picture this: You're parked by a quiet alpine lake. The sun's dipping low. Dinner's on. The wind moves through the trees — and not a soul is telling you when to pack up.

That's the kind of freedom Flatiron was built for.

No hookups. No limitations.
No waiting for the "right time."
Just you, your van, and the road ahead.
